Emotional Regulation: A Critical Developmental Capacity Underlying Social Communicative Competence.....	7
Assessing Communication in High Functioning Students With Autism Spectrum Disorders.....	13
Evaluating Treatment Efficacy for Language Facilitation in Autism.....	19

### ***Evidence-Based Practice***

It is the position of the American Speech-Language-Hearing Association that audiologists and speech-language pathologists incorporate the principles of evidence-based practice in clinical decision making to provide high quality clinical care. The term *evidence-based practice* refers to an approach in which current, high-quality research evidence is integrated with practitioner expertise and client preferences and values into the process of making clinical decisions.

Participants are encouraged to actively seek and critically evaluate the evidence basis for clinical procedures presented in this and other educational programs.

*Adopted by the Scientific and Professional Education Board  
April, 2006*

**Please note:** ASHA CEUs may not be earned more than once for the same program. If you completed this product when it was initially published in the Division newsletter, you are not eligible to take it again. Call the Action Center at 800-498-2071 to check your eligibility.
